PROFILE

I'm a Frontend developer who prioritizes application security, optimization, user experience along with a firm understanding of backend architecture. My proficiency spans across the following stacks; **React, React Native, VueJS, NodeJS, ExpressJS, JavaScript, TypeScript**, and many more, as a result of broadening my horizon, I've added skillset's outside of my scope such as User Interface design using tools like Figma and Adobe XD. With the experience gathered using these technologies, I've been able to build several applications with them. I believe with the experience and knowledge gathered from my journey thus far, I will contribute immensely through collaboration and hard work, and also by doing everything necessary to assist the team in order to get the job done.

EXPERIENCE

Seamless HR — Frontend Developer

July 21, 2021 - Present

Project Name: [SeamlessHRMS](#)

Link: https://play.google.com/store/apps/details?id=com.seamless_hrms

Description:

SeamlessHRMS is an Human Resources Management System Mobile application built to cater to Human Resources requirements ranging from Leave Applications to Requisitions, Approvals and many more. The project is still in Beta stage as of the time of updating this resume, and nearing completion. The project has been subscribed to by some of the top banks in Nigeria.

Role:

Was responsible for building the UI and API integration, as a result of some of the work done on the project, my team and I were awarded team of the month twice in a row.

Technology Stack:

React Native, Redux-toolkit, Styled-components.

Russelsmith Group — Frontend Developer

JUL 30, 2019 - July 21, 2021

Project Name: [RS EDGE](#)

Link: [russelsmithedge.com](#), [russelsmith.herokuapp.com](#) (V2)

Description:

Russelsmith Edge (RS EDGE) is an Enterprise Resource Planning application which was modeled on some of the world's best ERP systems such as SAP and Odoo. The knowledge gained from research and studies of ERP's lead us to the development of a very fine and sophisticated ERP system, which handles the following: **Vendor management, Inventory Requisition, Leave Requisition, Budgets, CRM, Sales Management, User Management, Roles**, etc.

Role:

Was responsible for building both the UI of RS EDGE, and was also the team lead on the project, we used Travis CI to handle continuous integration and deployment on the project and Trello as our project management tool. My biggest challenge on the project was finding the best architectural design for the backend, eventually we adopted a microservices architecture.

Technology Stack:

ReactJS, Redux, AWS, Material-UI, MongoDB, NodeJS, ExpressJS, GitHub, CI/CD

The GIG Group — Software Developer

JAN 1, 2019 - AUG 1, 2019

Project Name: [GIGM](#)

Link: [gigm.com](#)

Description:

God Is Good Motors (GIGM) is an online booking platform for mobile transportation either locally or between countries e.g., from Nigeria to Ghana and Vice Versa. On the GIGM website, you can book your trips, even hire a bus, and also visit several tourist attractions within Nigeria.

Role:

Collaborated with a team of 2 developers (1 frontend developer and 1 backend engineer) to design and build the web application. I was the Team

Lead on the project. My challenge on the project was ensuring all customer demands were met and making sure we adopted best practices while developing the platform.

Technology Stack:

Angular, jQuery, Bootstrap, animate.css, Bitbucket, Jira.

The Codecenter — Frontend Developer / Instructor

DEC 2017 - MAR 2019

Project Name: [The Code Center Website](http://thecodecenter.org)

Link: thecodecenter.org

Description:

The codecenter is a coding bootcamp for young aspiring developers, by providing an enabling environment for collaboration and growth. The idea behind the codecenter was to organise a bootcamp where people who are interested in coding could learn how to code. It was founded by a very close friend of mine, which I stayed on as an instructor and freelancer on occasion to help lend my support.

Role:

I worked alongside several brilliant engineers as an Instructor, helped bootcampers learn the basics of CSS, HTML and Javascript, and on projects I collaborated as a Frontend developer

Technology Stack:

Javascript, React, NodeJS, SASS, MongoDB, Bootstrap

Swapspace — Frontend Developer

MAR 2017 - DEC 2019

Description

Swapspace is a coding bootcamp, but also a tech hub where many developers could converge, collaborate, learn, and exchange ideas, or on occasion, contribute to projects. I worked as an instructor and freelancer during this period.

Role:

Frontend developer

Technology Stack:

Javascript, React, GraphQL, Redux, VueJS, PHP, Laravel, MySQL, Bootstrap,
MongoDB
