# IDOWU ARIFAYAN

**SOFTWARE DEVELOPER**

5, Alhaji Imam, first unity estate,
Ajah, Lagos.
**+234 (812) 759-5101**
arifayanidowu@gmail.com

## PROFILE

I'm a software engineer who prioritizes application security, user experience along with a solid backend architecture. My proficiency spans several technologies like PHP, Laravel, NodeJS, ExpressJS, JavaScript, TypeScript, React, Angular, VueJs, DevOps, SEO, and many more, as a result of broadening my horizon, I've added skillset's outside of my scope such as UI/UX and built several applications with all these technologies mentioned. With the knowledge and experience gathered from my journey to date, I will contribute immensely to the development of the company by collaboration and hard work, and also by doing everything necessary to get the job done.

## LANGUAGES/TECHNOLOGIES

- JavaScript
- TypeScript
- ReactJS
- Angular
- GraphQL
- NodeJS
- DevOps
- Expressjs
- HTML5
- CSS3
- Redux
- WordPress
- Docker
- React Native
- PHP
- Laravel
- AWS

## EXPERIENCE

### Seamless HR — *Frontend Developer*
July 21, 2021 - present

- Building a multi-platform HRMS system called seamlessHRMS using React-Native, firebase, and many more.

### Russelsmith Group — *Software Developer*
JUL 30, 2019 - July 21, 2021

- Maintenance of in-house Enterprise Resource Planning (ERP) software application Russelsmith Edge http://russelsmithedge.com
- Development and maintenance of our Corporate intranet using MS Sharepoint and Angular.

- Building and maintenance of an in-house library application where employees of the organization can borrow books, track books being borrowed, and notify employees when they've extended beyond the borrowed book's return date.

- Building and maintaining applications using ReactJS for the frontend and NodeJS as the backend technology of choice.
- Maintaining applications hosted on AWS.

- Collaboration with Team members using GITHUB, and Integrated testing of codebases using TravisCI and Jest for frontend testing, also using the power of Continuous deployment to ensure codebase being shipped is bug-free.
- Project Management:
  - Monitoring and ensuring that each project is carried out in line with the company's standard, adopting the right project management approach.
  - Also to determine the resources (time, money, technology) required to complete the project.
  - Task delegation and supervision to see that the project's goal is met.

## TOOLS

- Adobe XD
- Sketch
- Figma
- MongoDB
- MySQL
- Firebase
- GIT
- Google Material design
- CI/CD

## PROFILES

**GITHUB:**
https://github.com/stizzle123

**LINKEDIN:**
https://linkedin.com/in/olatubosun-arifayan

**WEBSITE:**
https://arifayanidowu.com

- Currently building the architecture of an HRMS and an attendance application using NodeJS.
- Developing the backend architecture for version 2 of Russelsmith Edge, which is the company's custom ERP application.
- Development of an attendance management PWA application using ReactJS, NodeJS, and firebase cloud messaging.
- RS GO - https://russelsmithgo.herokuapp.com

## The GIG Group — *Software Developer*

JAN 1, 2019 - AUG 1, 2019

- Using the latest in web technologies to create modern User Interfaces with less complexity and relatedness.

- Consuming APIs as well as providing a relatable interface that clients can interact with hitch-free.

  Responsibilities and success:

-  Designed and tested prototypes so as to gather more useful feedback to make usable products.

-  Developed the software on both mobile and web platforms with ReactJS and Node.

- Created and maintained in-house software using GIT and made the codebase available on the company's private repository.t

-  Collaborated with a team of 16 developers.

  Technologies: Reactjs, Nodejs, Expressjs, Angular, Prototyping, and design using Figma.

  Achievements thus far include:
  Frontend developer on the GIGM.com web and mobile platform and rotoxpress web.
  https://gigm.com, rotoxpress.com.ng

  Constant development iteration of The GIG Group and https://stellasmfb.com Microfinance Bank website

  https://thegiggroupng.com
  https://gig-careers.firebaseapp.com
  https://www.stellasmfb.com/

## The Codecenter — Full-stack Developer / Instructor
DEC  2017 - MAR 2019

- Onboarding and tutoring over 74 Bootcamp students on various tech stacks including HTML, CSS, JavaScript, User Interface Design, and DevOps tech.
- Mentoring and leading Bootcamp students to work on several projects.
- Involved in building and maintenance of client projects.
- Building and maintenance of mobile and web applications and services for a range of clients.

## PROJECTS

Germiny.org

Xtraders.herokuapp.com

Russelsmithedge.herokuapp.com

Russelsmithgo.herokuapp.com

Barbadoxltd.com

thecodecenter.org

- Designed and developed in-house web applications, collaborating using GIT and with proper documentation included to make the codebase maintainable.

## **Swapspace** — Full-stack Developer

MAR  2017 - DEC 2019

- Collaborating on projects using Github.
- Managing projects and server provisioning.
- Involved in building and maintenance of client projects.
- Building and maintenance of mobile and web applications and services for a range of clients.
- Building API for frontend consumption using Laravel
